

# Hitachi Data Systems Academy

## Education Services

### | Format / Delivery Type:

Instructor-led Training (ILT)

### | Duration:

3 days

### | Target Audience:

Hitachi Data Systems Employees  
and Hitachi Channel Partners

- GSS Developer
- Engineer

### | Prerequisite Courses:

- Previous course work related to Hitachi Universal Storage Platform™, Hitachi Lightning Series, Hitachi Adaptable Modular Storage, or Workgroup Modular Storage Systems

### | Required Knowledge and Skills:

General knowledge of storage terms and concepts associated with the open systems and/or Microsoft Windows operating environments.

### | Supplemental Courses:

- None

## **TSI0207 - Hitachi Device Manager Software v6 Installation and Configuration**

### | Course Description:

This three day instructor-led course provides a full product overview, including in-depth training to install, configure and troubleshoot Hitachi Device Manager Software

This course also includes practical exercises on best practices of installation, setup and configuration, storage and host discovery and important management operations which will intensify Device Manager software understanding.

The equipment used for this course includes open system servers as Sun Solaris and/or Microsoft® Windows® 2003 and Hitachi Enterprise and/or Modular Storage systems.

### | Course Objectives:

Upon completion of the course, the learner should be able to:

- Describe how Hitachi Device Manager software resolves storage management problems
- Describe the architecture of Device Manager software
- Identify the Device Manager system installation requirements
- Install, setup and configure the different Device Manager software components
- Recite the basic information presented in Device Manager GUI
- Perform best practices operations for storage systems discovery and host setup
- Create customized logical groups structures
- Perform basic management operations
- Explain existing maintenance and troubleshooting procedures
- Identify the features provided with Hitachi Provisioning Manager Software

## | Agenda:

### Content Modules:

- Overview
- Planning and Implementation
- New Installation on Microsoft Windows
- Basic Setup and Configuration
- Common Agent Installation
- Maintenance and Troubleshooting
- Hitachi Provisioning Manager Software
- Upgrade Installation on Microsoft Windows
- New Installation on Sun Solaris
- Upgrade Installation on Sun Solaris

### Learning Activities – Labs:

- Server New Installation – Microsoft Windows
- Initial Setup Operations
- Agent Installation – Microsoft Windows
- Best Practices Operations
- Maintenance and Troubleshooting
- Provisioning Manager Operations
- Server and Agent Installation on Sun Solaris
