

METHOD OF PROCEDURE INFORMATION
(STANDARD PRODUCTS)

1. GENERAL

1.1 Scope of Section

1.11 This section describes the "standard product" type information document which PECC Installation Engineering may provide the installer for use in the preparation of his "Method of Procedure (MOP)."

1.2 Purpose

1.21 The furnishing of this type of information by the PECC will help to eliminate duplication of installation effort, reduce the cost of MOP preparation and provide greater uniformity of "standard product" type information in MOP's.

2. GENERAL CRITERIA FOR ISSUANCE

2.1 This type of information may be prepared by the PECC Installation Engineering Organizations whenever it is possible to furnish "standard product" type

information to assist the installer when he is making additions or modifications to equipment to insure that he will not cause service interruptions.

3. TYPES OF INFORMATION WHICH WILL BE PROVIDED

3.1 The document will contain the following information:

(a) Work operations associated with a particular addition or modification written by steps and divided into preliminary and actual work.

(b) Designations of responsibility for each step (Tel. Co. or WE Co.).

(c) Restoral procedures.

4. THE FORMAT IN WHICH INFORMATION WILL BE PROVIDED

4.1 The "standard product" information will be provided in a format similar to Handbook 3, Section 9.2, Exhibits A, B and C (Method of Procedure).

Manager, Engineering Practices
