2. CHANGES TO SECTION

2.001 On page 1, add the following paragraph:

1.02.1 New (conventional) service order codes were adopted for use with the EF-2 and 2B-EF-2 generic programs. However, the translations can be configured with the old (No. 2 ESS unique) service order codes as an option. These old codes are common to all previous No. 2 and No. 2B ESS generic programs. The EF-2 and 2B-EF-2 generic programs can be arranged to recognize either option. In this section the term "conventional (new)" or "No. 2 ESS unique (old)" is used to identify the service order code for the keywords in each TTY input message given.

2.004 On page 5, Step 9 and page 10, Step 47, for No. 2B ESS offices, change ss=Number of trunk scanner in decimal (00-11) to ss=Number of trunk scanner in decimal (00-11 for the 2B-EF-1 generic program) or (00-30 for the 2B-EF-2 generic program).

2.002 On page 2, paragraph 3.02, before system response, add the following:

The system response for offices using No. 2 ESS unique (old) code is as follows:

2.003 On page 2, paragraph 3.02, after system response and before the explanation of variable fields, add the following:

The system response for offices using conventional (new) code is as follows:

AR VY TRK aaa bbb
