

NO. 3 ESS
 SYSTEM VERIFICATION & OPERATIONAL TESTING
 GENERAL INFORMATION

CONTENTS

<p>1. GENERAL INFORMATION</p> <p>1.1 Purpose</p> <p>1.2 Types of System Verification and Operational Testing General Information (503.XX Series)</p>	<p>1.21 Hardware Description, 503.21</p> <p>1.22 Formats and Procedures, 503.3X Series</p> <p>1.23 Common Operator Procedures, 503.4X Series</p>
<hr/>	
<p>1. <u>GENERAL INFORMATION</u></p> <p>1.1 <u>Purpose</u></p> <p>1.11 The 503 series sections present general information which could be useful to the installer in the performance of required procedures and testing effort.</p> <p>1.2 <u>Types of System Verification and Operational Testing General Information (503.XX Series)</u></p> <p>1.21 <u>Hardware Description, 503.21</u></p> <p>1.211 Overwrite Procedure Information</p>	<p>1.22 <u>Formats and Procedures, 503.3X Series</u></p> <p>1.221 Formats and procedures general information is intended to provide a basic knowledge of the direct Man-Machine communications requirements. Such basic knowledge should relieve the placement of associated detailed and repetitious information in required installation/test procedures.</p> <p>1.23 <u>Common Operator Procedure, 503.4X Series</u></p> <p>1.231 Common operator procedures are intended to identify those procedures which may be used many times during system verification or operational testing. They also provide a structure for using procedures in the support of required procedures designated in other sections.</p>

No arrows shown due to extensive changes.
