4. PROCEDURE

1.1 Description

4.1 Test Procedure

1.11 This section describes the tests to be performed whenever the Privacy and/or Lockout feature is provided.

4.101 Select one unrestricted line from the Line Assignments section of the Customer Order Document.

1.12 Lockout prevents an attendant from re-entering a completed call without being recalled.

4.102 Utilizing the 249A Adapter, connect the telephone set to the circuit pack test line associated with the station chosen in step 4.101.

1.13 With privacy the calling party is split when the attendant is connected to the called party.

4.103 Establish an incoming central office call to the attendant console. Extend the central office call to the station chosen in step 4.101. Answer station, verify calling party is split.

1.13 If Privacy is provided, Lockout must be provided.

2. RECORDS

4.104 At attendant console momentarily depress the HOLD key. Verify that HOLD lamp associated with the loop key is lit.

2.1 Form SD-97-1313 is required for recording the results of this test.

4.105 Momentarily depress the loop key associated with the lit HOLD lamp. Verify that attendant cannot enter the loop.

3. TEST EQUIPMENT

3.1 Telephone Set

4.106 At the station recall the attendant. Verify ANS lamp flashed.
