

WIDEBAND DATA STATION USING DATA SET 303
FOUR-WIRE POINT-TO-POINT PRIVATE LINE
(COMMERCIAL SERVICE)
INSTALLATION AND CONNECTIONS

1. GENERAL

1.001 This addendum supplements Section 593-800-200.

1.002 It is reissued to:

- Conform with standard Bell System Practice (BSP) format and Pacific Company specifications
- Update the revised paragraph number to agree with the main section
- Include proprietary information.

Note: Marginal arrows used to designate changes are omitted.

1.003 This addendum specifies the allowable distance between the 804A-type and its associated 806B-type data auxiliary sets.

3. COMPONENT INSTALLATION

The following change applies to Part 3 of this section.

- 3.28 — Revised

3.28 The DAS 804A-type is of the desk top-type telephone equipment and is not to be mounted in the cabinet (Fig. 1). It may be placed on top of the cabinet or in any other convenient location within 75-feet of its associated data auxiliary set 806B-type.
