

ASSIGNMENT OFFICE DISCREPANCY ROUTINE

1. GENERAL

1.001 This Addendum supplements Section 680-550-010.

1.002 This Addendum is reissued to delete Line or Station Transfer reason code "25A" and add Line or Station Transfer reason code "26A".

1.003 This Addendum changes references to forms and practices in the main section so that they are applicable to SWBT practices.

1.01 (Change this paragraph to read:)

The purpose of a discrepancy routine is to ensure that changes in assignments of either outside or central office facilities are posted to all records and furnished to all persons concerned. These changes may result from either service order or maintenance activity. Usually there is an existing assignment involved in a discrepancy. Since both "from" and "to" assignment information is involved, forms SW-6574a-f or SW-6314, as covered in Addendum 680-300-013SW, will be the documents used to convey changes to those persons responsible for the maintenance of various records.

1.06 (Change this paragraph to read:)

Transfer of designed circuits should be avoided if possible. When it is necessary to transfer any "designed service", Form SW-6203, Designed Circuit Channel Changes, will be prepared as outlined in Section V65.303.9.

2. CHANGES IN SERVICE ORDER ASSIGNMENTS

2.02 (Change the reference from Form E-2575 to SW-6314.)

5. CALL FOR ASSIGNMENT INFORMATION

5.01 (Change the reference from Form E-2575 to SW-6314.)

8. CHANGES REQUIRED WHEN THE ASSIGNMENT CENTER IS CLOSED

8.02 (Change the reference from Form E-2575 to SW-6314.)

EXPLANATION OF CODES, FORM E-6042

(Add the following explanation code to the list:)

26A - A change in assignment for the proper feed when the original assignment was an "attempted guess" for locations which do not have a definite address, such as rural areas.
