List of Tables

Table 6-1	Manufacturer/Supplier/Related Service Company Codes Sorted by Code	6-1
Table 7-1	Manufacturer/Supplier/Related Service Company Codes Sorted by Company Name	7-1

1 Purpose

This Practice describes the COMMON LANGUAGE standard codes for the representation of companies that manufacture equipment, or provide supplies and/or services for Telcordia customers.

2 Scope

This Practice is applicable to circuit administration, provisioning, design, engineering, and other personnel having responsibility for designing, planning, and/or servicing telephone equipment.

3 Reason for Issue

This Practice revises and replaces BR-751-100-650, Issue 11, January 2001. It is re-issued to include all codes that have been assigned or changed since the last issue and up to the publication of this document.

Two additional columns, Use Current Code and Previous Company Name are now shown on [Table 6-1](#) and [Table 7-1](#).

- Use Current Code - This code supercedes the previous 4 character manufacturer's code, due to a buyout, merger or acquisition.
- Previous Company Name - Previous name of the company before a buyout, merger, name change or acquisition.

4 General

Questions concerning these codes should be directed through the reader's COMMON LANGUAGE Coordinator to the COMMON LANGUAGE Products Business Unit, Telcordia, General Codes Code Set Subject Matter Expert. Requests for documentation, paper or on-line, should also be directed to the reader's COMMON LANGUAGE Coordinator.

The Telcordia COMMON LANGUAGE Products Business Unit provides the technical expertise for maintaining the General Codes Code Sets. The COMMON LANGUAGE Technical Advisory Group (TAG) contributes to this process in accordance with procedures outlined in BR 751-000-102, *COMMON LANGUAGE® Code Set Request Procedures*.

5 Description

Telcordia assigns these codes as the maintenance agent for ANSI T1.220.

The Manufacturer/Supplier/Related Service Company Codes for telephone equipment are four-character, alphabetic codes. These codes are listed alphabetically in [Table 6-1](#) by code, and in [Table 7-1](#) by company name. Both tables include the location of each company.
