

## CODES — 104 TEST LINE LOCATIONS

### 1. GENERAL

**1.01** This section provides an alphabetical grouping of the cities equipped with Code 104 test lines. They may be reached from a distant city over dial intermediate (intertoll) trunks. Offices within the city will be designated only where there would be a question otherwise as to which office is equipped. This list will be reissued periodically to keep it up to date.

**1.02** This issue lists additional cities and gives noise check information for each of the cities where the setting of the noise checking circuit is other than 35 dba (i.e., 40 or 45 dba). The figure for the setting is indicated in parentheses after the name of the city.

**1.03** As this is a general revision, arrows ordinarily used to indicate changes have been omitted.
