

NON-CODED TOOLS
HARDWOOD WEDGE A-2852

WEDGE per Drawing A-2852

TO BE MADE OF MAPLE
NOTE: FINISH AND OTHER DETAILS (EXCEPT AS SHOWN) TO BE THE SAME AS FOR THE STANDARD WEDGE TOOL.

Hardwood wedge, similar to Nos. 410A and 410B tools (see sub-division A706), except that it is arranged to permit a higher lift and is provided with a slight off-set on the upper side which serves as a means of preventing the wedge from slipping when it is located in a multiple cable.

For use in lifting multiple cable in offices having a large multiple pile-up.
