

WIRE ROPE

GENERAL

NOTES CONCERNING THIS ADDENDUM

This Addendum supplements Section J6. 505 and retains the safety precautions to be observed when using wire rope which appeared in the previous Addendum. Information concerning mild plow steel rope in Addendum A has been omitted since this grade of rope is no longer standard in Southern California.

The cross reference "See Addendum" should be marked in J6. 505 to indicate the following:

- Paragraph 2. 14 - added
- Paragraph 2. 15 - added
- Paragraph 2. 16 - added
- Paragraph 7. 04 - added

2. SAFETY PRECAUTIONS

- 2. 14 Wire rope shall be so placed as to avoid obstructing high-ways or other thoroughfares.
- 2. 15 When not actually in use, wire rope should be wound on drum.
- 2. 16 On returning wire rope to the storeroom, each coil shall be tagged either "good" or "defective."

7. CUTTING WIRE ROPE

- 7. 04 The rope should be held in a vise during the cutting operation but if no vise is available, a second person should hold the rope at each side of the point where the cut is being made.
