

LOCALIZATION OF CONTACT NOISE

STEP-BY-STEP OFFICES

1. GENERAL

1.01 This addendum supplements Section K24.71, Issue 1, and is issued to cover the fact that test sets are available which include the equipment shown in Section K24.71, Figures 1, 2, 3 and 9, and that it will be unnecessary to assemble this equipment locally as stated in the section.

1.02 The arrangements covered in Figures 1 and 3 of Section K24.71 have been combined into a dialing, holding and terminating test set per Drawing SHS-1202 with provision for using the portion corresponding to Figure 3, omitting it, or using an external battery supply transmission circuit, as dictated by the requirements for a particular test.

1.03 The arrangement covered in Figure 2 of Section K24.71 has been incorporated into a 200 ohm terminating test set per Drawing SHS-681 with binding posts for terminating a connection from the I.D.F., and for strapping out the transmission condensers.

1.04 The arrangement covered in Figure 9 of Section K24.71 has been incorporated into a C.L.R. trunk transmission circuit per Drawing SGS-1552 with binding posts corresponding to the T-1, R-1, T-2 and R-2 terminals of Figure 9.

1.05 Where Section K24.71 refers to Figures 1, 2, 3 or 9 it shall be considered as referring to the appropriate test set drawing numbers instead.

*Refers to Los Angeles only
All drawing numbers refer to Southern California drawings.*
