

Google Cloud Backup and Recovery

Veeam Backup *for Google Cloud*

Challenge

Google Cloud provides a robust cloud platform for you to create and deploy applications without having to maintain your own infrastructure. However, as referenced in the Google Shared Responsibility Matrix, your applications and data remain your responsibility to secure and protect.

Veeam Backup *for Google Cloud* delivers native, policy-based protection for reliable recovery from accidental deletion, ransomware and other data loss scenarios. An API-first approach, secure backups and full- and file-level restore ensure resilient protection that's easy and cost-optimized, freeing up time and resources for strategic IT priorities.

Google Cloud native backup and recovery

Secure access and management of data to overcome ransomware

Powerful recovery options that keep businesses productive

Zero-fuss backup that meets SLAs

Key capabilities

Relentless security

- **Isolated backups:** Logical separation of backup data from production projects
- **Secure access:** Least-privilege IAM and role-based access controls (RBAC)
- **Encrypted:** Data integrity through AES 256-bit encryption

Zero compromise

- **Policy-based:** Automated detection and protection with native backups
- **Cost-optimized:** Backup lifecycling to object storage with cost calculations
- **Hybrid ready:** Operationally consistent management across the hybrid and multi cloud*

Fast, reliable recovery

- **Recover anywhere:** Cross-project, region and platform* restores
- **Full- and file-level:** Full instance or granular recovery, in-place or as new
- **Simplified recovery:** Wizard-driven, automated and self-service workflows

Latest release

- **Cloud SQL for PostgreSQL backup:** Extend native backup and recovery to Cloud SQL for PostgreSQL databases
- **Enterprise-friendly:** Manage multiple projects from a single service account and target Google Cloud Folders
- **Community Edition:** Get FREE Google Cloud and hybrid cloud backup and recovery in Veeam Backup & Replication

* When combined with Veeam Backup & Replication
