

# D-Link Quick Installation Guide

This product can be set up using any current web browser, i.e., Internet Explorer 6x, Netscape Navigator 7x.

## DI-604UP

Wired Router  
with USB Printer Port

## Before You Begin

1. If you purchased this router to share your high-speed Internet connection with other computers, you must have either an Ethernet-based Cable or a DSL modem with an established Internet account from an Internet Service Provider (ISP).
2. It's best to use the same computer that is connected to your modem for configuring the DI-604UP router. The DI-604UP Broadband Router acts as a DHCP server and will assign all the necessary IP address information on your network. **See Appendix at the end of this Quick Installation Guide or the Manual on the CD-ROM for setting each network adapter to automatically obtain an IP address.**

## Check Your Package Contents

These are the items included with your DI-604UP purchase:

• DI-604UP Broadband Router

• CD-ROM

• Ethernet (CAT5 UTP/Straight-Through) Cable

• 5V DC, 2 A Power Adapter

Using a power supply with a different voltage rating will damage and void the warranty for this product.

If any of the above items are missing, please contact your reseller.

## 1

# Connecting The DI-604UP Broadband Router To Your Network

**A.** First, connect the power adapter to the **receptor** at the back panel of the DI-604UP and then plug the other end of the power adapter to a wall outlet or power strip. The Power LED will turn **ON** to indicate proper operation.

**B.** Insert one end of an Ethernet cable to the **WAN port** on the back panel of the DI-604UP and the other end to the Ethernet port located on your Cable or DSL modem. The WAN LED light will illuminate to indicate proper connection.

**C.** Insert one end of an Ethernet cable to **LAN port 1** on the back panel of the DI-604UP and the other end to an available Ethernet port on the network adapter in the computer you will use to configure the DI-604UP. The LED light for LAN Port 1 will illuminate to indicate proper connection. (Note: Some computers already have network adapters pre-installed.)

## 2

## Restart Your Computer

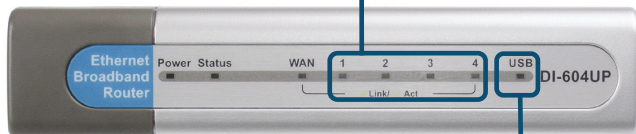

## 3

## Connecting Additional Devices to the DI-604UP Broadband Router

Using additional Ethernet (CAT5 UTP/Straight-Through) cables, connect your Ethernet-equipped computer(s) to one of the 3 remaining Ethernet LAN ports on the back panel of the DI-604UP.

### LAN Port LEDs.

Each of the LAN ports on the back of the DI-604UP have a corresponding LED light on the front panel of the unit. When a proper connection has been made to a computer that is ON, the LED on the front panel should illuminate.

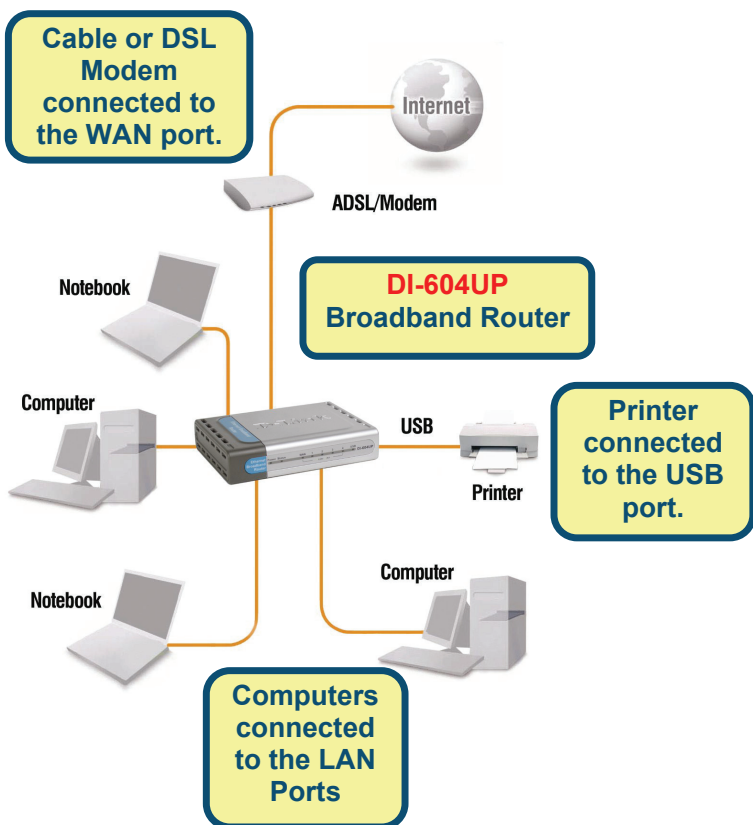

### USB Port LED.

The USB port on the back of the DI-604UP has a corresponding LED light on the front panel of the unit. When a proper connection has been made to a device that is ON, the LED on the front panel should illuminate.

Additional printer may be added to your DI-604UP to increase functionality. By connecting a printer to the USB port at the back of the router, you may share print capabilities over your wired network. A valid USB connection will cause the corresponding USB LED at the front to light. For more information regarding USB connections and device implementation, see the DI-604UP user guide.

When you have completed the steps in this *Quick Installation Guide*, your connected network should look similar to this:

## 4

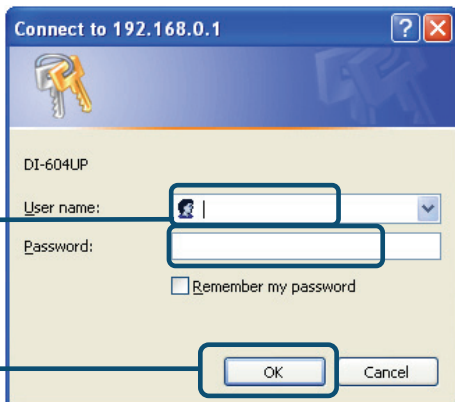

## Using The Setup Wizard

Open your Web browser and type **"http://192.168.0.1"** into the URL address box. Then press the **Enter** or **Return** key.

The logon pop-up screen will appear.

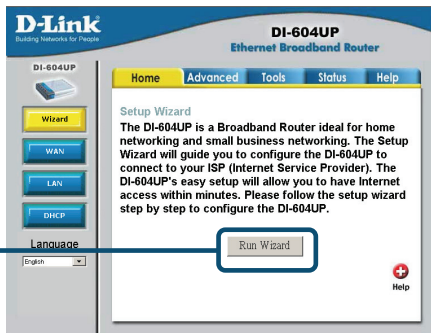

Type **"admin"** for the username and leave the password field blank.

Click **OK**

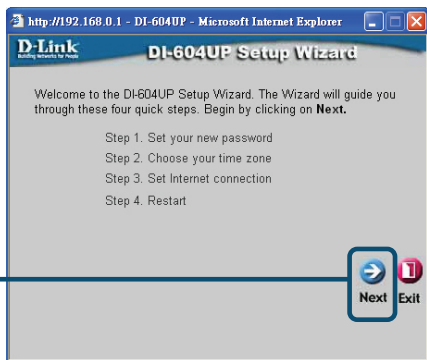

Once you have logged in, the **Home** screen will appear.

Click **Run Wizard**

You will see the following screens.

Click **Next**

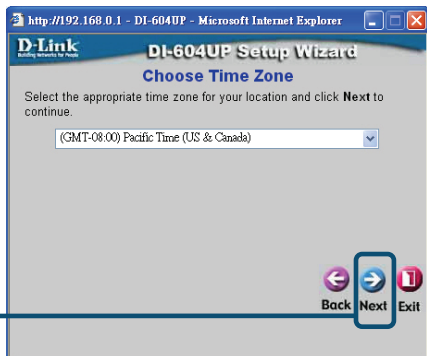

**Step 1 - Set up your new password.** You have the option to establish a password.

Click **Next**

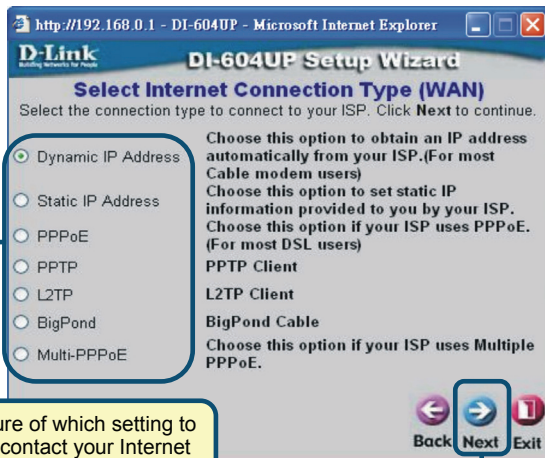

**Step 2 - Choose your time zone.**

4

## The Setup Wizard (continued)

Select the type of Internet connection for your router.

If you selected **Dynamic IP Address**, this screen will appear:

**“Clone MAC Address”** button to automatically copy the MAC address of the network adapter in your computer. You can also manually type in the MAC address.

**What is a MAC address?** Each network adapter has a discrete Media Access Control (MAC) address. Note that some computers and peripherals may already include built-in network adapters.

Click **Next**

If your ISP requires a **Static IP Address**, and this option is selected, then this screen will appear:

**Enter the IP address information originally provided to you by your ISP.** You will need to complete all the required fields.

Click **Next**

If your ISP uses **PPPoE** (Point-to-Point Protocol over Ethernet) and this option is selected, then this screen will appear:

Click **Next.**

## 5

# Your Setup is Complete!

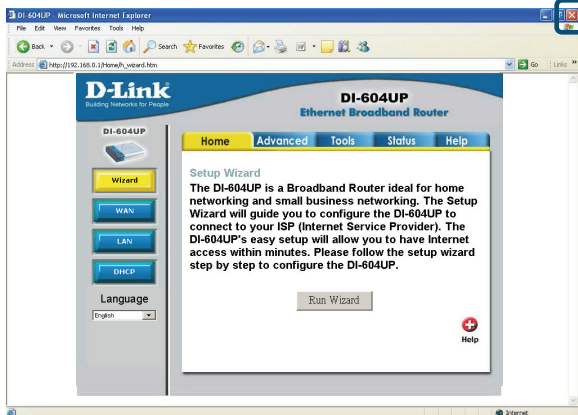

You will be returned to the **Home** tab.

# 6

## Test Your Internet Connection

Click **Exit**

Relaunch your Web browser (i.e., *Internet Explorer* or *Netscape Navigator*), to link to your favorite Web site to test your Internet connection.

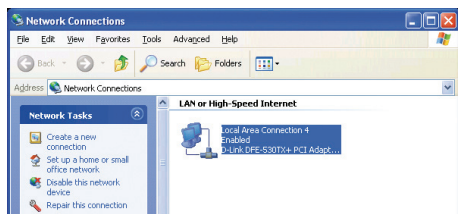

For additional settings or information, refer to the **Advanced**, **Tools**, or **Status** tabs on the web-management interface; or to the manual located on the CD-ROM.

# APPENDIX

To connect to the network, make sure the network adapter in your computer is configured properly. Here's how to configure the network adapter to obtain an IP address automatically for the DI-604UP Broadband Router.

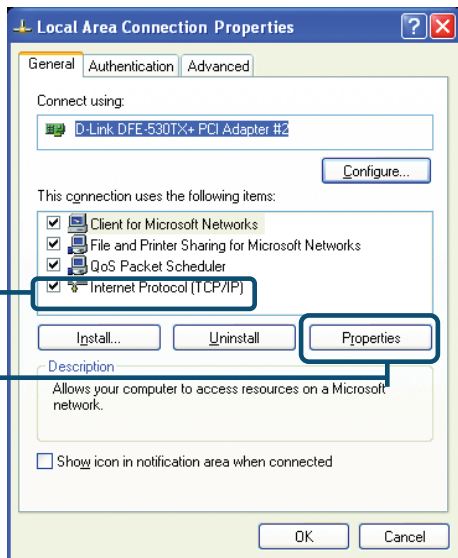

For **Microsoft Windows XP**:

Go to **Start > right click on My Network Places > select Properties > Double-click on the Network Connection** associated with the Ethernet adapter (i.e., D-Link DFE-530TX+).

Click **Internet Protocol (TCP/IP)**

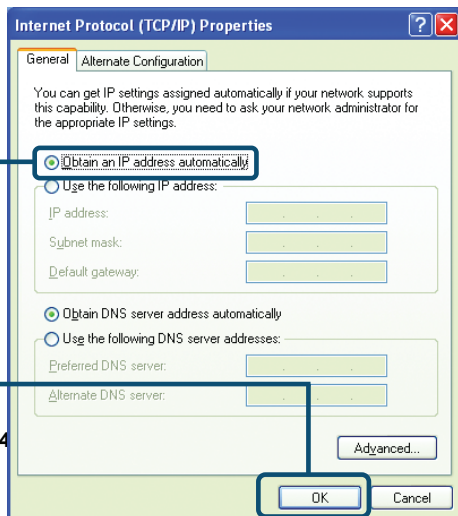

Click **Properties**

Select **Obtain an IP address automatically**

Click **OK**

**Restart your computer**

## For Apple Macintosh OS X:

Go to the **Apple Menu** and **Select System Preferences**.

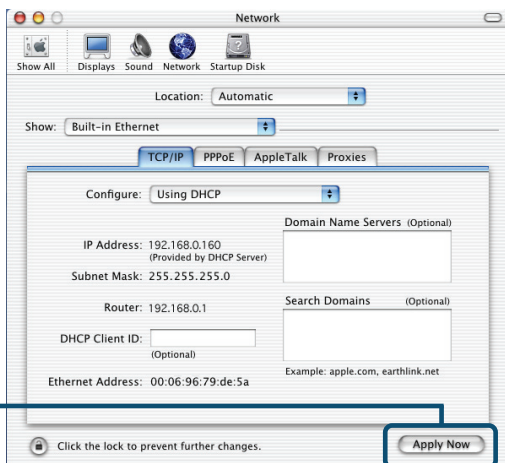

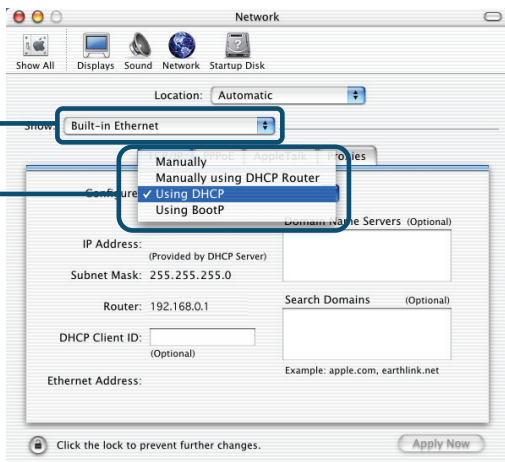

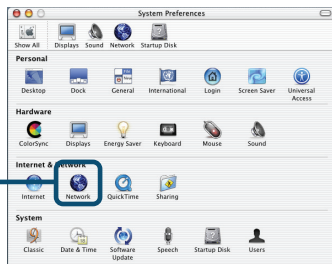

Click on **Network**

Select **Built-in Ethernet** in the Show pull-down menu

Select **Using DHCP** in the Configure pull-down menu

Click on **Apply Now**

The IP address information, the Subnet Mask, the Router's IP address and the Ethernet adapter address will appear.

## Technical Support

D-Link's website contains the latest user documentation and software updates for D-Link products.

Canadian customers can contact D-Link Technical Support through our website or by phone.
