One Ethernet Cable

CD-ROM

If any of the above items are missing, please contact your reseller.

DHP-306AV

About Your Product

D-Link announces a fast, 200Mbps PowerLine AV Network Adapter that allows you to network your home computers, networking devices and gaming devices through the most pervasive medium in your home, the electric power lines. With the PowerLine AV Network Adapter, you can access the Internet, transfer files, play games, and stream HD video.

Note: For hardware overview, please refer to the user manual.

Recommendations

- For best results, use in a regular wall outlet without any other product plugged into the same outlet. Connecting this product to a power strip or a surge protector may adversely affect the performance of this product.
- Avoid using the PowerLine AV Network Adapter in an electrical outlet that is located near an appliance that uses a lot of power, such as a washer or dryer, refrigerator, microwave, hair dryer, or air conditioning unit.
- To verify connectivity or if you are having connection problems, plug the adapters in the same room to verify whether your home’s electrical wiring is contributing to the issue. The adapters’ PowerLine LED indicators will illuminate if the connection is established.

Hardware Installation

Step 1

Plug the PowerLine AV Network Adapter into an AC wall outlet.

Note: Power source is confirmed when the green LED Power Indicator on the PowerLine AV Network Adapter is illuminated.

Step 2

Connect the included Ethernet cable to the network cable connector located on the PowerLine AV Network Adapter and attach the other end of the Ethernet cable to the network or PC.

Note: Network Connectivity is confirmed when the PowerLine and Ethernet LED indicators on the PowerLine AV Network Adapter are illuminated.

Note: If you set security on your other adapters and you have plugged in your new D-Link PowerLine AV Network Adapter, press the DHP-306AV Simple Connect button for 2 seconds. Then, press the Simple Connect button on any adapter in your existing network for 2 seconds. Both buttons must be pressed within 2 minutes.

Your Network Setup

Note: A minimum of two D-Link PowerLine AV devices are required to create a PowerLine Network.

Technical Support

Having trouble installing your new product? D-Link’s website contains the latest user documentation and software updates for D-Link products. U.S. and Canadian customers can contact D-Link Technical Support through our website or by phone.
