Step 1 — Fan

- Flip over the laptop
- Although the battery is missing in this photo, it is not necessary to remove.
- Locate the largest removable panel on the back and remove the four screws connecting it.
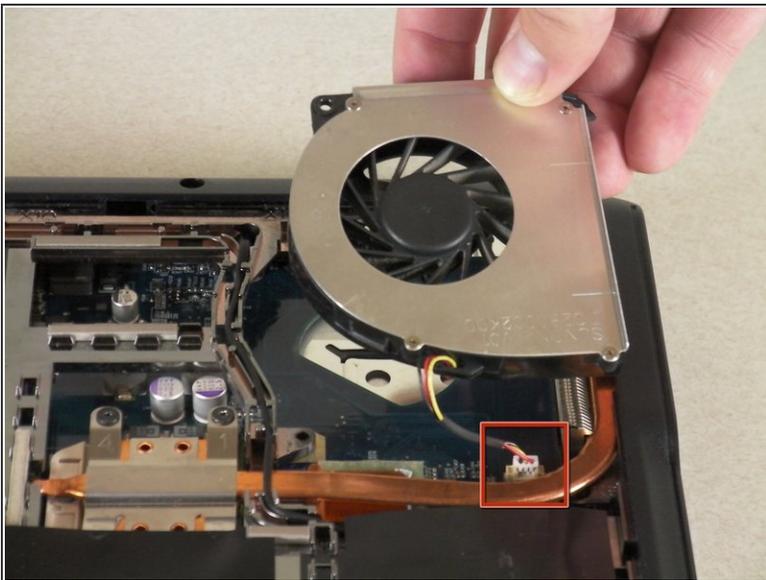

Step 2

- Lift up and remove the panel.

Step 3

- Locate the fan and remove the two screws connecting it.

Step 4

- Lift out the fan and detach the cable that connects the fan to the motherboard.

  ⚠ The fan can break easily. Be careful when removing.

- When detaching the cable, do not pull on the cable itself. Instead, use a small spudger to detach it at the white section that connects it to the motherboard.
