

Asus Q200E-CT144H Screen Replacement

This guide will demonstrate how to remove and replace the screen on the Asus Q200E-CT144H laptop.

Written By: Kirsti Wattles

INTRODUCTION

If your laptop has experienced any physical damage to the screen, this can be a big problem considering that the screen is responsible for displaying information. Damage such as cracks can be dangerous if any of the loose glass from a shattered screen comes out of place. However, if there is no visible damage, there may be other issues afoot. Your laptop's screen could be blacked out due to lack of charge, possible overheating, or the screen just won't work. If this is the case, you can use this guide to replace the laptop screen.

TOOLS:

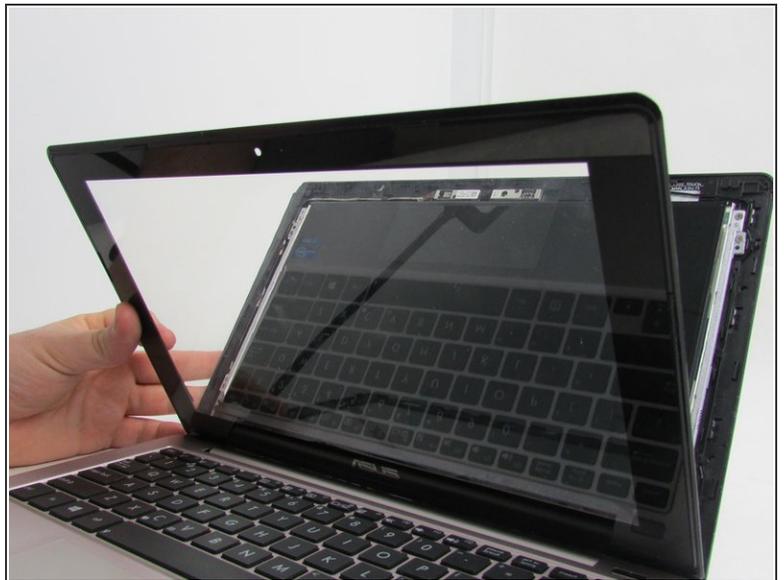

- [Phillips #00 Screwdriver](#) (1)
 - [Metal Spudger](#) (1)
 - [Tweezers](#) (1)
-

Step 1 — Screen

- Turn off the laptop and disconnect the power cable.
- ⚠ If the laptop is powered on, it could cause an electric shock.
- Open the laptop and place it on a hard, flat surface with the screen facing up.

Step 2

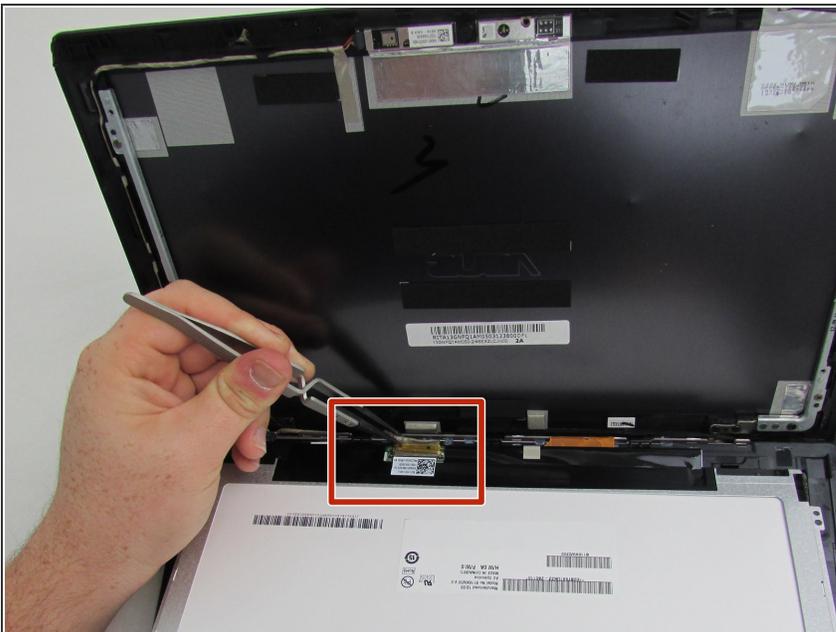

- Take a metal spudger and insert it under the screen.
- Slowly move the spudger across the length of the screen, separating the sections.

Step 3

- Remove the four 3.3mm Phillips #00 screws.

Step 4

- Pull apart the screen from the casing of the laptop.
- Disconnect the power connector using tweezers.

To reassemble your device, follow these instructions in reverse order.
