Step 1 — Back Cover

- Lay the tablet down on a flat surface with the screen facing up, and the external camera facing upwards and closest to you.

Step 2

- Insert the plastic opening tool in the space between the screen and the back cover above the volume buttons.

- Slide the plastic opening tool gently along the sides.

- ⓘ If a small gap is not created between the screen and the back cover, pry gently upward at each of these latching points.

Step 3

- Place the spudger in an open space to keep the back case from shutting while you continue to slide the opening tool.
Step 4

● Remove the back cover with your hands once all points have been unlatched. It should separate completely from the screen that contains the battery and chip components.
Step 5 — Button

● Orient the tablet's back cover so that the inside faces up and the buttons are positioned at the top left corner.

Step 6

- Unlatch the clear rubber holder from the posts with the tweezers.

Step 7

- With tweezers, pull the rubber holder from the back cover completely.
