

Backpack Strap Buckle Replacement

How to replace a broken or worn out backpack attachment strap buckle.

Written By: Olajide Abatti

INTRODUCTION

This guide will teach you how to take apart a backpack strap in order to replace a worn out or broken strap buckle. If you do not know how to sew, there are links included below to teach you how to go about it.

Step-by-Step:

TOOLS:

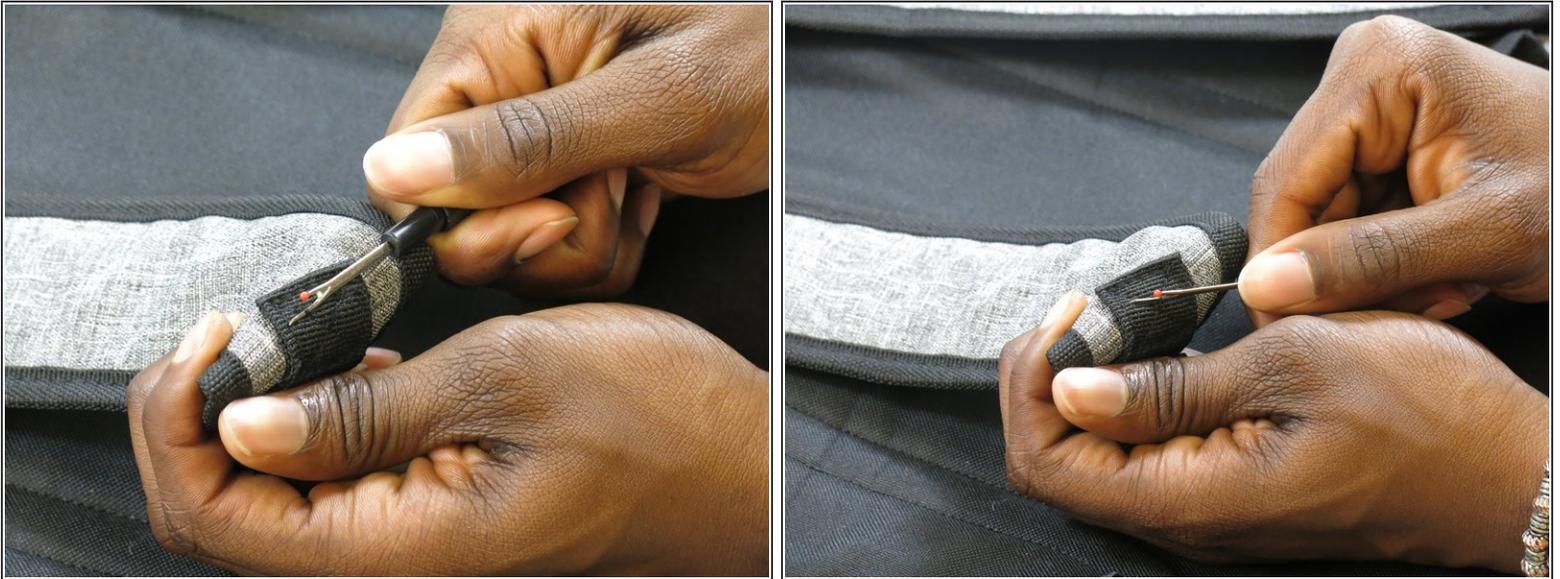

- [Seam Ripper](#) (1)
- [Sewing Kit](#) (1)

PARTS:

- [Backpack strap buckle](#) (1)

Step 1 — Strap Buckle

- Use a seam ripper to rip out the thread.
- ⓘ The thread to be cut is the one that attaches the buckle to the strap. It's usually sewn to form an X on it.

Step 2

- Pick up the strap buckle that was attached to the strap.
- Take out the material from the old buckle.

Step 3

- Place the material into the new buckle.
- Look for the original spot which it was originally sewn and place it there.

Step 4

- Use a needle and thread to sew the material linking strap and buckle to the bag.
- ⓘ Using a sewing machine if available would make this easier.
- ⓘ Sew along the "X" outline on material attached to the buckle.

Step 5

- Finally place the strap length adjuster into the buckle.

To reassemble your device, follow these instructions in reverse order.
