Step 1 — Disengage the Spark Plug

⚠ Before you begin, ensure that the machine is powered down and cool to the touch.

- Disconnect the spark plug to prevent the engine from accidentally starting up during service:
  - Grab the plastic spark plug cap at the end of the spark plug wire.

  - Firmly pull to disconnect the spark plug cap from the spark plug.

Step 2 — Place Wheel Chocks

- To prevent the concrete saw from rolling during service, place wheel chocks in front of and behind a rear wheel.
