

Eureka AirSpeed Bagless Zuum Vacuum Accessory Holder Replacement

If accessory holder breaks, this guide will help you to replace the holder.

Written By: Celina Burchett

INTRODUCTION

If the accessory holder is no longer able to hold the multiple tools associated with the vacuum, this guide outlines the its replacement.

TOOLS:

- [T15 Security Torx Screwdriver](#) (1)
-

Step 1 — Hose

- On the back of the vacuum, pull the handle connected to the hose away from the vacuum.

Step 2

- Grasp the thick smooth collar at the bottom of the hose and twist left (counterclockwise) to remove the hose.

Step 3 — Accessory Holder

- Using a T15 Torx Security Screwdriver, remove the screw on each side of the indentation in which the hose normally rests.

Step 4

- Upon removal of the two screws, the accessory holder can be removed from the vacuum body.

To reassemble your device, follow these instructions in reverse order.
