

Float RP2 Propedal Removal

Fox Shock Float RP2 Propedal Removal

Written By: Dominik Schnabelrauch

INTRODUCTION

Use this guide to remove the Fox Shocks Float RP2 Propedal.

TOOLS:

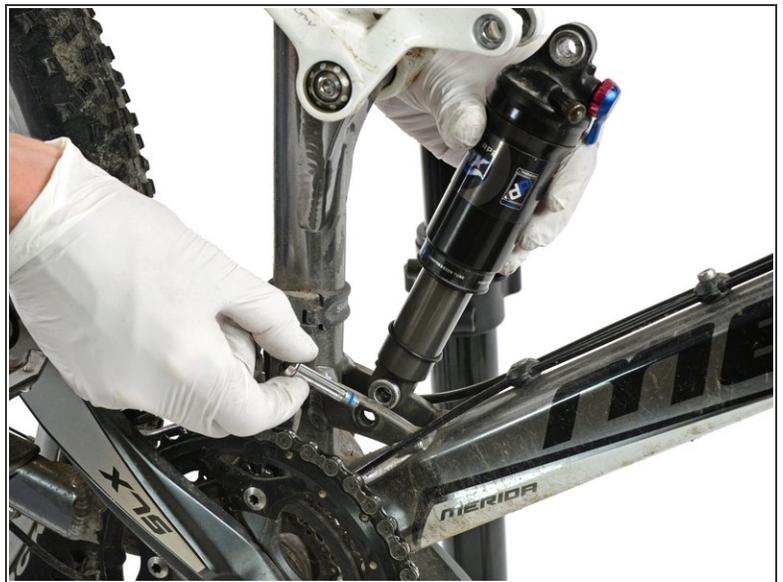

- [Lezyne Portashop bicycle toolkit](#) (1)
-

Step 1 — Float RP2 Propedal Removal

- Open the upper damper bolt using a 6mm allen key.
- Remove the damper bolt.

Step 2

- Open the lower damper bolt using a 6mm allen key and a wrench.
- Remove the damper bolt and lift out the Float RP2 Propedal damper.

To reassemble your bike, follow these instructions in reverse order.
