

# HP 15-R011DX Battery Replacement

This guide will demonstrate how to remove and replace the battery.

Written By: Eric Ferrer

## INTRODUCTION

One of the quickest parts to “die” on a laptop is the battery. Not being able to hold a charge, or only being able to operate your laptop while plugged in are signs that you may need to replace your battery. It is also a good idea to disconnect the battery before operating on your laptop.

## Step 1 — Battery

- Slide the lock mechanism on the left side of the laptop to the right.

## Step 2

- While holding the right slide mechanism, remove the battery from the laptop.
- ⓘ The battery is not pictured here because it is missing from this particular device.

To reassemble your device, follow these instructions in reverse order.
