Step 1 — LCD Display

- There is a hidden screw underneath the model sticker on the front panel.

- Peel the model sticker off the cover.

- This will expose the T10 screw securing the panel.

Step 2

- Remove the single 12mm-T10 screw securing the front panel to the printer body.

- Loosen the panel cover from the printer body.

- There is a ribbon cable connected to the backside of the cover. Disconnect the cable before separating the panel completely.

Step 3

- Gently remove the No-Fuss ribbon cable from the front panel.

Step 4

- Remove the seven 8mm screws using the Torx T6 screwdriver.

- Remove the motherboard from the front-panel housing.

- ⓘ The LCD display is on the opposite side.

To reassemble your device, follow these instructions in reverse order.
