Written By: Addison

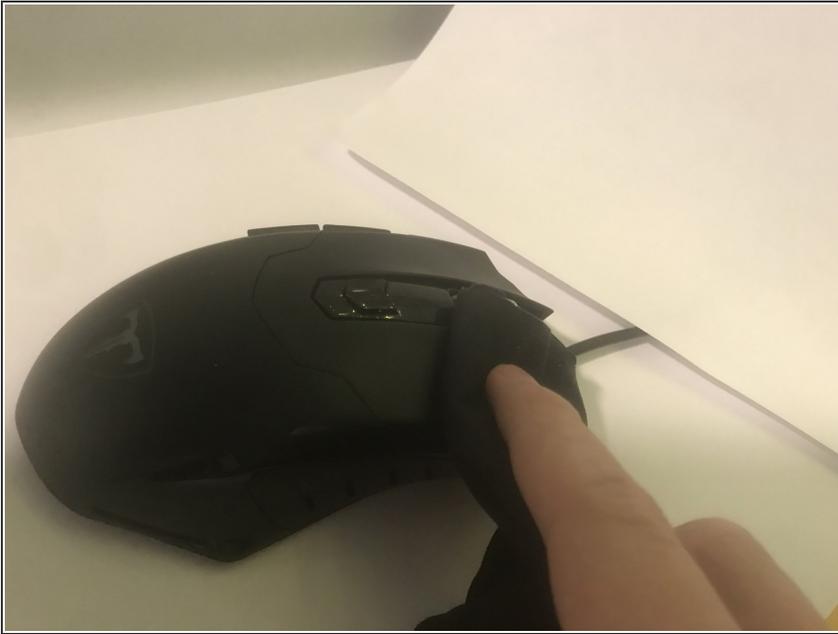

INTRODUCTION

Your mouse may get residue, sticky material, or dust on on the body of mouse or on the sensors. Here is how to clean your mouse safely. Remember to unplug your mouse before cleaning.

TOOLS:

- [Q-Tips](#) (1)
 - [Toothpick](#) (1)
 - [Isopropyl Alcohol 70%](#) (1)
-

Step 1 — How to clean your Pictek Entry-Level Gaming Mouse (YTGEPC098AB-USAE1)

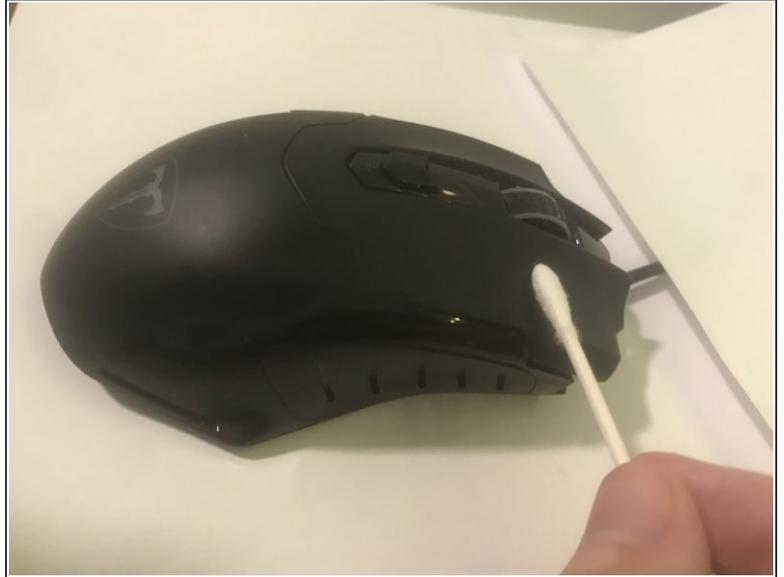

- Wipe the whole mouse down with a dry or slightly damp microfiber cloth.
- ⓘ This removes extra dust or grime from the mouse's exterior.

Step 2

- Run a toothpick around any crevices in the mouse's body.
- ⓘ The toothpick will help pry out anything that might be causing problems.

Step 3

- Dip your q-tip into into the alcohol.
- Wipe the body of the mouse.

Step 4

- Gently brush the mouse's sensor to remove any residue.

To reassemble your device, follow these instructions in reverse order.
