Step 1 — Xbox 360 External HDD (Hard Disk Drive)

- Get your old xbox 360 External HDD(Hard Disk Drive)
- Locate the screws

Step 2 — Dismantle

- Remove the Microsoft sticker.
 - Unscrew the screws.
 - Push the HDD slightly

Step 3 — The End

- Insert it down into the slots. You should hear a slight click if it has been inserted correctly.

 I hear Microsoft's warranty support service doesn't take kindly to freely bouncing hard drives.

Cheaper and less hassle than to get a hard drive for the Xbox 360 Slim and transfer data.
