Hp Zbook studio g3 RAM Replacement

Replacing the 8GB of ram in my HP zBook studio g3 mobile workstation to 16 GB

Written By: jort

INTRODUCTION

Replacing the 8GB of ram in my HP zBook studio g3 mobile workstation to 16 GB

🔧 TOOLS:

- T9 Torx Screwdriver (1)

⚙ PARTS:

- DDR4-2400 260 Pin Sodimm modules (1)

Step 1 — Removing the dust filter

- Remove the 4 screws holding down the dust filter
- Remove the dust filter

Step 2 — Removing the housing

- Remove the 4 outer screws.
- Remove the 2 inner screws holding the housing down.
- Now lift the housing. This may require some force

| |

Step 3 — Removing the old Ram module

- Remove the old ram module by pushing these two tabs outwards. The module should swing up

- Now pull the module out away from the holder

⚠ Note: The removal of the module should not require a lot of force

Step 4 — Installing the new memory

- Orient the memory modules such that then notch in the connector lines up with the grove in the module

- slide the module all the way into the holder such that the pins are in the connector

- Push down on the module to lock it in the holders

⚠ Note: Make sure the module is in straight
