INTRODUCTION

Are your beaters not staying in? You may need to replace the beater rings.

🔧 TOOLS:
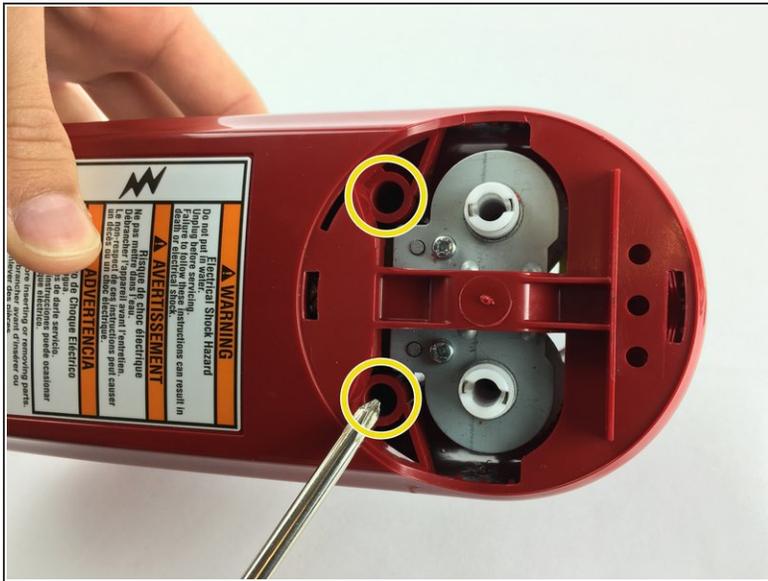

- iFixit Opening Tools (1)
- Phillips #2 Screwdriver (1)
- Tweezers (1)

Step 1 — Beater Rings

- Insert the back of a plastic opening tool into one of the beater holes

- Apply force to pull the circular plastic part off.

- If necessary, use the other side of the plastic opening tool to pry the circular plastic part off.
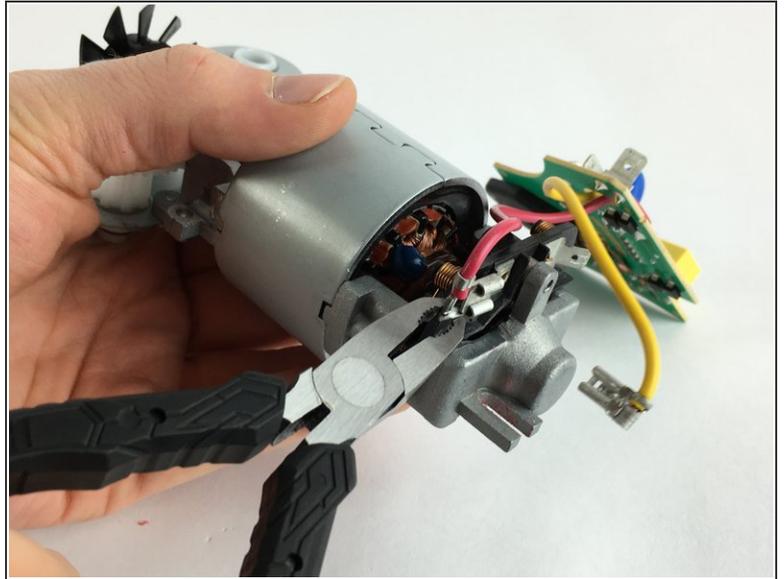

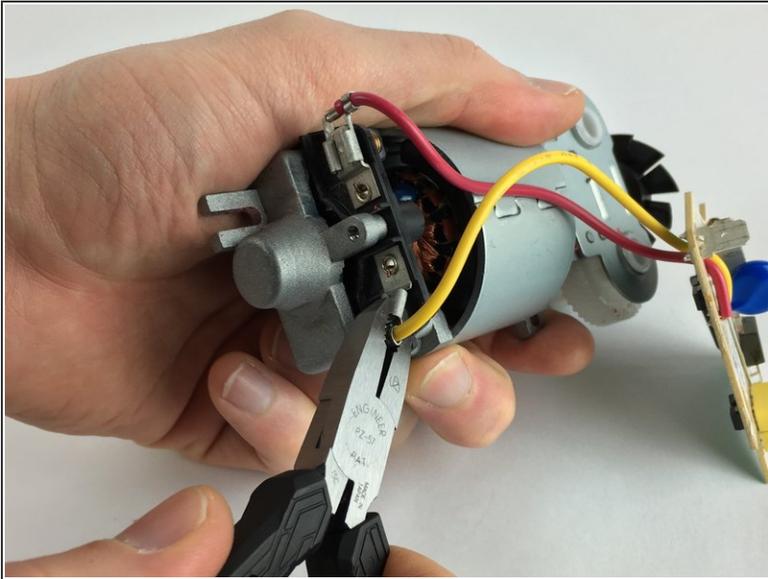

Step 2

- Use a Phillips #2 screwdriver to remove the two 20mm screws holding the bottom plastic piece in place.

- Remove the bottom plastic piece using a plastic opening tool.

Step 3

- Using a Phillips 2 screwdriver, remove the three 20.0mm screws holding the motor assembly in place.

- Use your hands to remove the motor assembly.

Step 4

- Firmly grip the motor in your hand. Using pliers, pull the connectors off the motors.

⚠ Some force may be required. Be careful not to cut yourself on any electrical components.

Step 5

- Lie the motor down flat on a table.

- Using a pair of tweezers, remove the ring from the plastic knob.
