Lenovo ThinkPad S431 Damaged keyboard key Replacement

How to remove the damaged keyboard key from the Lenovo ThinkPad.

Written By: Mohammed AlManai

INTRODUCTION

This guide will show the steps of removing a damaged keyboard key from your laptop. The keyboard is an input device; you can enter any characters and functions by pressing keyboard keys.

🔧 TOOLS:

- iFixit Opening Tools (1)

This document was generated on 2019-10-21 03:04:32 AM (MST).

Step 1 — Damaged keyboard key

- Slide under the key using a flat object and pop it out of place.

⚠️ Using metal to open fragile parts of a laptop could cause damage!Instead use the blue opening tool listed in the tool section above.

Step 2

- The key is now out of place.

To reassemble your device, follow these instructions in reverse order.
