

Motorola 120c Keypad Replacement

This guide shows how to remove the keypad from the Motorola 120c.

Written By: Mitchell Nesheim

INTRODUCTION

This process involves first removing the battery, outer case, and motherboard. After, the keypad can be easily removed.

TOOLS:

- [T6 Torx Screwdriver](#) (1)
-

Step 1 — Battery

- Hold the phone and pull the back latch down towards the bottom.
- Remove the back panel by releasing the latch and lifting from the top.

Step 2

- Remove the battery by pushing the bottom end towards the top, then lifting up.

Step 3 — Motherboard

- Once the battery is out, unscrew the six 7.0 mm screws with T-6 screwdriver.
- Once the screws are removed, simply lift the back panel off

Step 4

- Remove the motherboard by lifting it up and out.

Step 5 — Keypad

- Peel the keypad from the front case.
- The keypad may be stuck either to the logic board, below the screen, or the phone case itself.

To reassemble your device, follow these instructions in reverse order.
