

Motorola Moto E4 Plus Rear Camera Replacement

This guide will provide the steps required to remove and replace the rear facing camera.

Written By: Jack Haseman

INTRODUCTION

For the official, updated iFixit guide, [click here](#). This guide is archived for historical purposes.

This guide is helpful for any user who is having trouble with their backward facing camera. Problems with the camera may include a crack on the lens or the camera, blurry photos, or an all together non functioning camera.

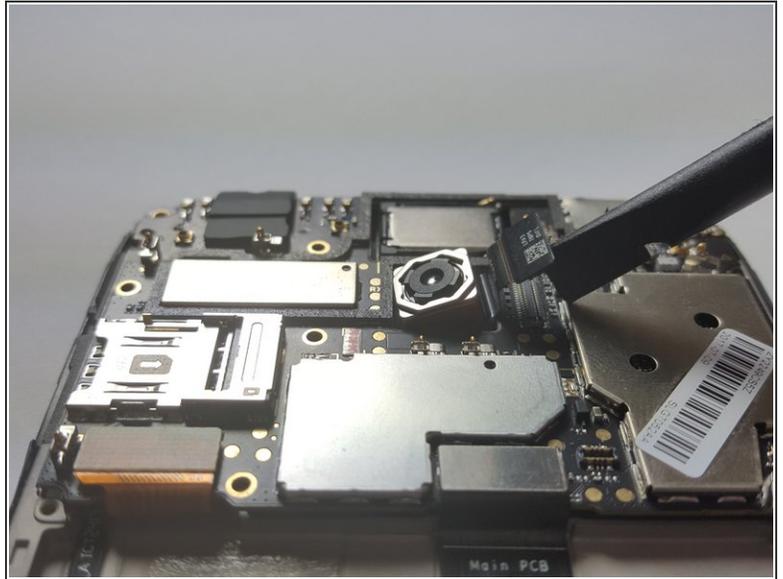

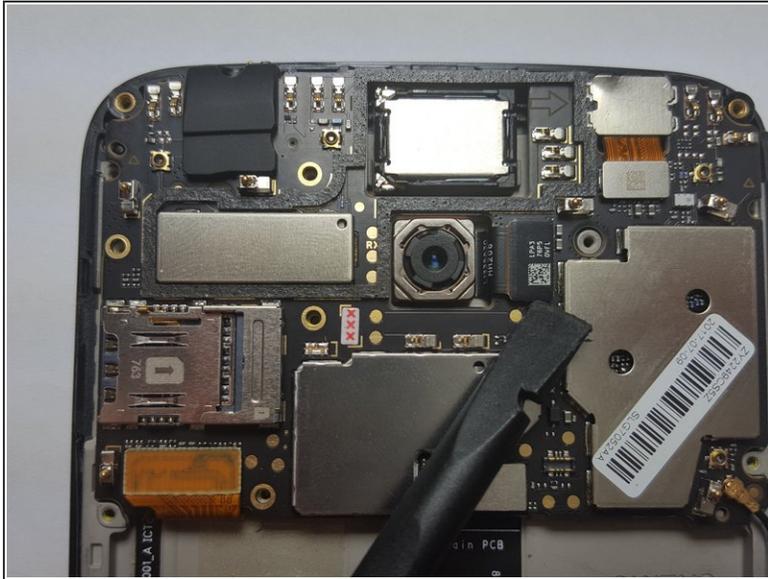

TOOLS:

- [T4 Torx Screwdriver](#) (1)
- [Spudger](#) (1)
- [Precision Tweezers Set](#) (1)

PARTS:

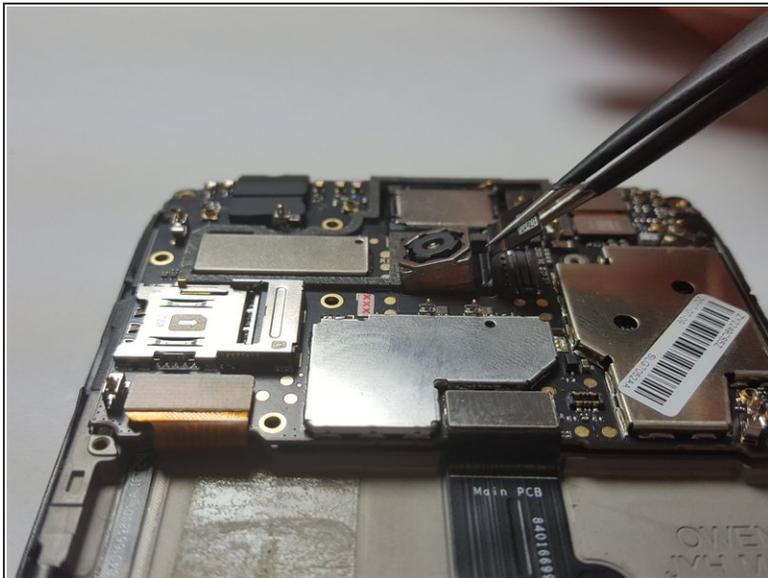

- [Motorola HE50 Battery](#) (1)
 - [Moto E4 Back Camera](#) (1)
-

Step 1 — Rear Camera

- Use the Spudger to lift up and detach the Back Facing Camera from the Motherboard.

Step 2

- Use the Precision Tweezers to remove the camera from the phone.

To reassemble your device, follow these instructions in reverse order.
