# Panasonic Lumix DMC-FX01 Front Casing Replacement

Restore the front of your camera to its former glory.

Written By: Andrew

## INTRODUCTION

Use this guide to replace the front casing of your Panasonic Lumix DMC-FX01.

## 🔧 TOOLS:

- Phillips #00 Screwdriver (1)

## Step 1 — Battery

- Locate the memory card and battery card latch on the bottom of the camera.

- Slide the latch to the open position.

## Step 2

- Open the battery latch, and slide the battery release lever to the right.

## Step 3

- Remove the battery from the camera.

## Step 4 — Rear Casing

- Using a size #00 Phillips screwdriver, remove the three 4.58 mm screws on the bottom of the camera.
- Use this screwdriver for all screws in the device.

## Step 7

- Remove the two 3.15 mm screws on the right side of the camera.

## Step 8

- Remove the bottom right panel.

## Step 9

- Gently remove the back casing.

⚠️ Start at the bottom and carefully pry towards the top to get this piece free.

## Step 10 — LCD Screen

- Gently lift up the LCD screen.

- Using a plastic prying tool, flip up the latch that holds the thin ribbon in place.

- It should fall out on its own or with a gentle tug.

## Step 11

● Gently tug the thicker ribbon to remove it from its housing.

## Step 12 — Front Casing

● Remove the two black 5.35 mm screws that hold in the front faceplate.

ⓘ There may be a third screw the the right of the lens assembly.

## Step 13

⚠ Carefully remove the upper assembly, which houses the buttons and the flash battery.

## Step 14

⚠ Carefully remove the front casing after verifying that the thin plastic around the lens is not still attached.

To reassemble your device, follow these instructions in reverse order.
