 **TOOLS:**

- [Heat Gun](#) (1)
- [Pry Bar](#) (1)
- [Soldering Iron](#) (1)
- [Super Glue](#) (1)
- [Binder Clip](#) (1)

 **PARTS:**

- [Dr Dre Powerbeats 2 and 3 Replacement Batteries](#) (1)

Step 1 — Locate Battery.

- The battery is located inside the right side ear piece.

Step 2 — Heat Right Side.

- Heat the right side gently at 140 F for about 3 minutes.
- Do not over heat or it will melt the housing.

Step 3 — Remove Battery Cover/Casing

- After heating, gently remove the cover/casing as shown in the picture.
- Take your time and re-heat if cover/casing does not remove smoothly.

Step 4 — Desolder & Replace Battery

- Desolder battery using soldering iron and replace with replacement battery.

Step 5 — Reattach Battery Cover/Casing

- After battery is replaced, apply super glue to the border of the inside of the battery cover/casing and put it back in place.
- Use small clamps/binder clip to hold the housing in place while the super glue dries up.

To reassemble your device, follow these instructions in reverse order.
