

Presidential 2.0 Power Box Cover Removal

This guide will show you how to correctly remove the power box cover of the Presidential 2.0

Written By: Nick

 **TOOLS:**

- 6 inch Phillips PH1 (1)
-

Step 1 — Removing the Screws

- First remove the 2 Phillips head screws on the front of the power cover.
- **BEWARE** : this may be more difficult if on carpet and may require another person to push the chair off the floor.

Step 2

- Using a Phillips head screw driver preferable Size 1 , remove the 5 screws.
- Once all screws are removed , Place your hands where the red rectangles are marked, Place your fingers under the lip of that cover and give a slight pull upwards.
- Take Care when removing this cover as there is a wire running across it.

Step 3

- You're Done !

To reassemble your device, follow these instructions in reverse order. Be sure you are snapping the ball and joint pieces back together when your are reassembling .
