Step 1 — Removing Saeco Vienna Sup 018 Top Cover

⚠️ **Never forget: Pull the plug out!**

- Remove all attachments such as drawers, water tank, brewing unit.

- Carefully pull the steam button out. If it is too tight, first loosen the cover (steps 2 to 4), lift slightly and then push the ratchet nose with a small screwdriver.

Step 2

- The bean container is fixed with two Phillipps screws. Unscrew those.

- ⓘ The adjusters of the grinder and the quantity of coffee (if present) can remain.

- Lift the bean container up und remove it from the device.

Step 3

- ● Remove the single T10 Torx screw on the rear edge of the top cover under the water reservoir.

- ● Remove the single Phillipps screw on the rear edge of the top cover under the container of the coffee beans.

- ● There are two Phillipps screws on the frontal unterside edge of the top cover. Turn them out.

Step 4

- ● Now the cover can be lifted off. Pull backwards, then diagonally forward. Remove the silicone hose from the water tank.

To reassemble your device, follow the above steps in reverse order.
