Step 1 — Battery

- First, make sure that the camera is turned off. The dial must line up the word "off" with the white tally mark.

Step 2

- You can find the battery compartment on the side of the camera. Search for the arrow and the abreviation "BATT"

- Stick your finger nail (or a blue opening tool if you wish) in the notch and flip open the door to expose the battery compartment.

Step 3

- The yellow latch holds down an extra cover for the batteries

- Push on it in to open the compartment

- Insert batteries according to the charges marked on the inside part of the cover

To reassemble your device, follow these instructions in reverse order.
