

Sony Vaio Duo 11 SSD Replacement

Replace SSD in SONY VAIO DUo 11

Written By: Zero

INTRODUCTION

Before start the procedure, make a system backup (I use ToDo Backup Free).

Some pictures were found in:

TOOLS:

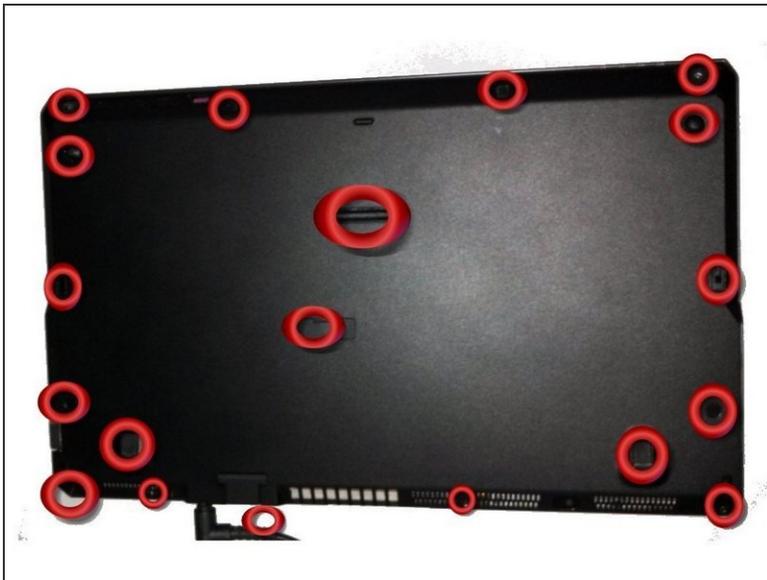

- Pro Tech Toolkit (1)

Step 1 — SSD

- Make a system backup!

Step 2

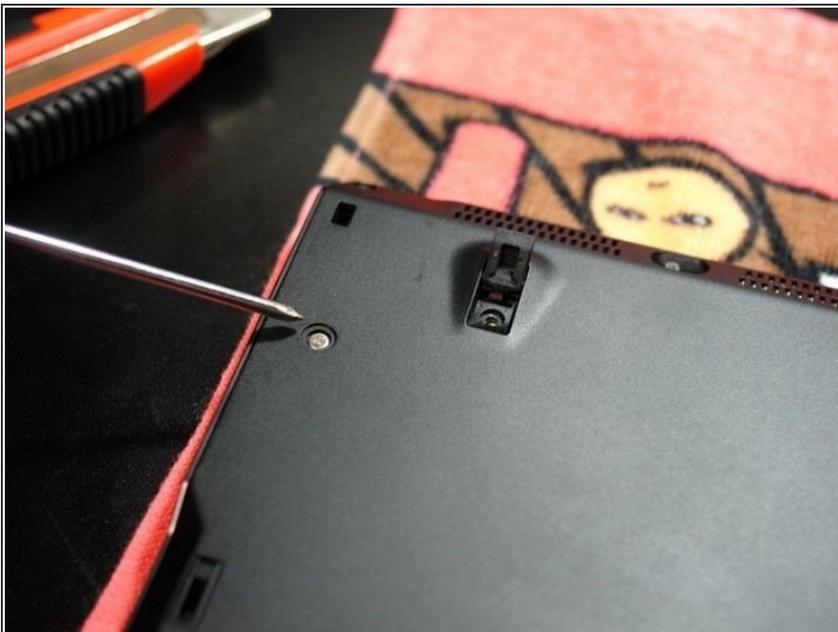

- Detach the rubbers and save them
- Open the slots
- Remove (gently) the speaker covers

Step 3

- Use a sharp tool to lift up

Step 4

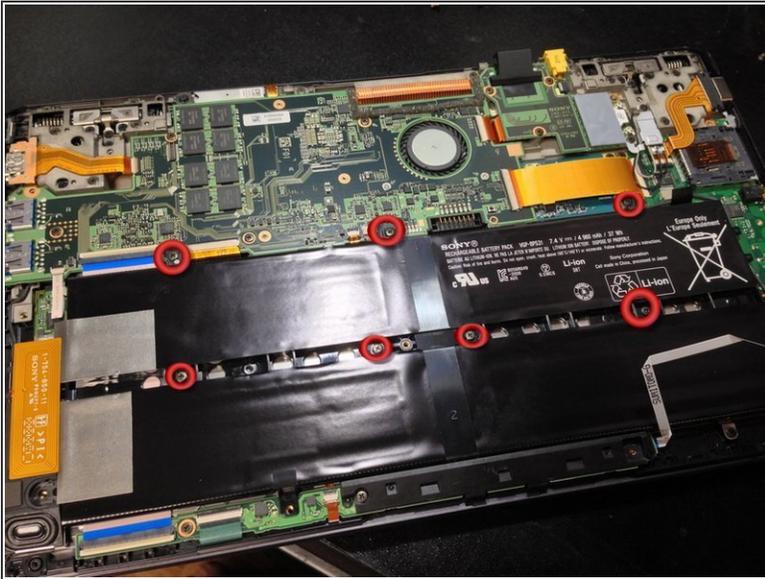

- Remove cover

Step 5

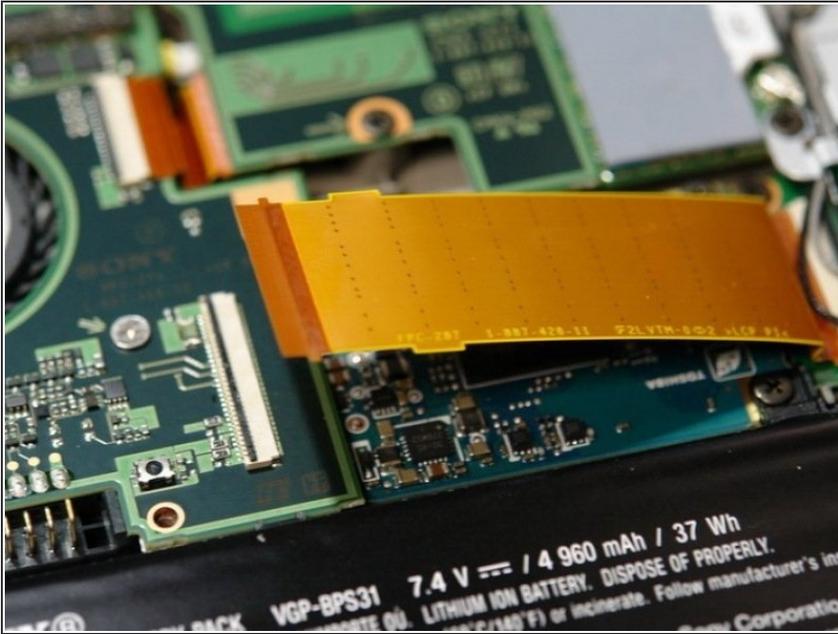

- Remove all the screws (attention: these screws are different! Save them)

Step 6

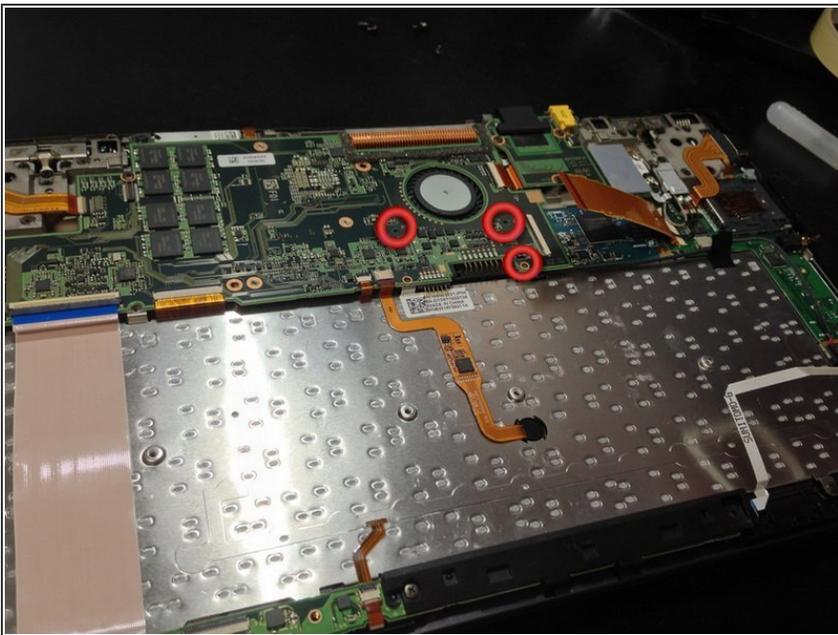

- Remove the cover carefully. ...One side is attached with a white cable. (Attention: don't detach this short white flat cable)
- Remove the battery (removing these screws)
- (When assembly : Remember to hide then piece of plastic beside the battery(circle in the second picture) behind the plastic. Otherwise you will not can press the right button of mouse).

Step 7

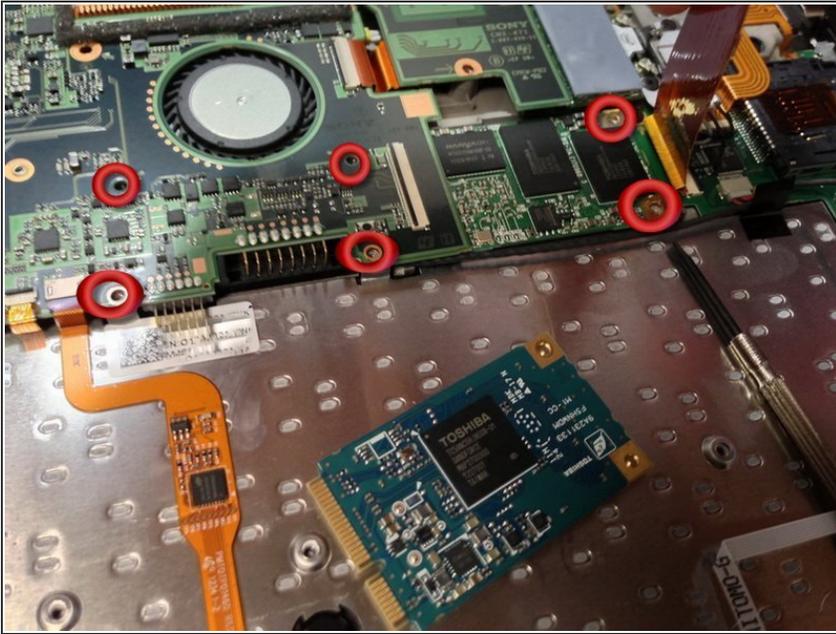

- Detach flat cable. To do so, you have to lift the black plastic bar, then release the orange ribbon.

Step 8

- Remove these screws to make easy the removal of the ssd

Step 9

- The remove of the ssd
- Remove the SSD (gently)
- Replace the SSD (it is a mSATA SSD)
- Put back the screws and close the unit

To reassemble your device, follow these instructions in reverse order.
