

# Technique - Test the Battery

Testing the battery before diving into disassembly may save you time and work.

Written By: Melinda Phan

 **TOOLS:**

- [Multimeter](#) (1)
-

## Step 1 — Technique - Test the Battery

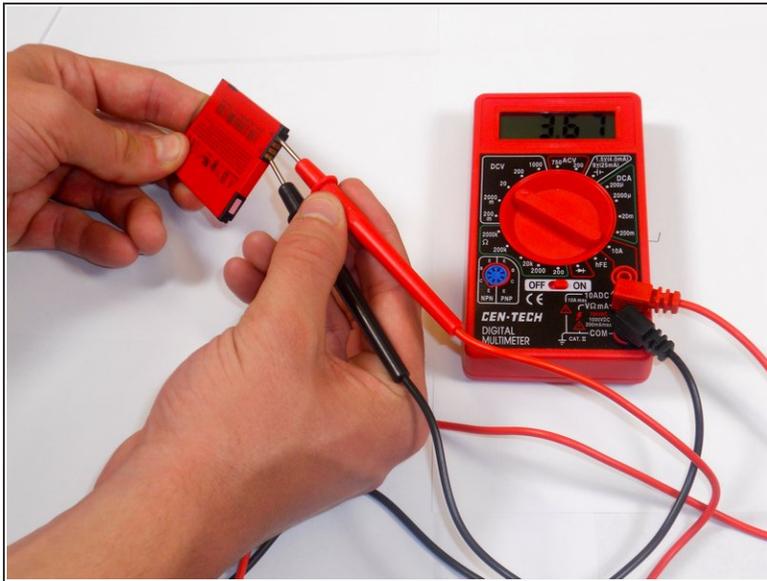

- Remove back cover by applying pressure and sliding up towards the top of the phone.

## Step 2

- Remove the battery by lifting from slot on the right hand side.

### Step 3

- Use Multimeter to test the voltage of the battery.
- Put the black lead into ground slot of multimeter and the red lead into the V(ohm)mA slot.
- Place the red and black leads to the two outside metal plate, each on opposite sides, on the battery as shown.
- Check that the voltage displayed on the multimeter matches closely to the voltage defined on the battery. Normally 3.7 V.

To reassemble your device, follow these instructions in reverse order.
