Step 1 — Power Button

- Start by first removing the battery.

- Move the first release switch to the right position.

- Move the second release switch to the right position while pulling the battery towards the top of the netbook.

Step 2

- Using the bit driver and a Phillips #0 bit, remove the three circled screws, 5 mm in length.

This document was generated on 2019-09-17 11:27:39 PM (MST).
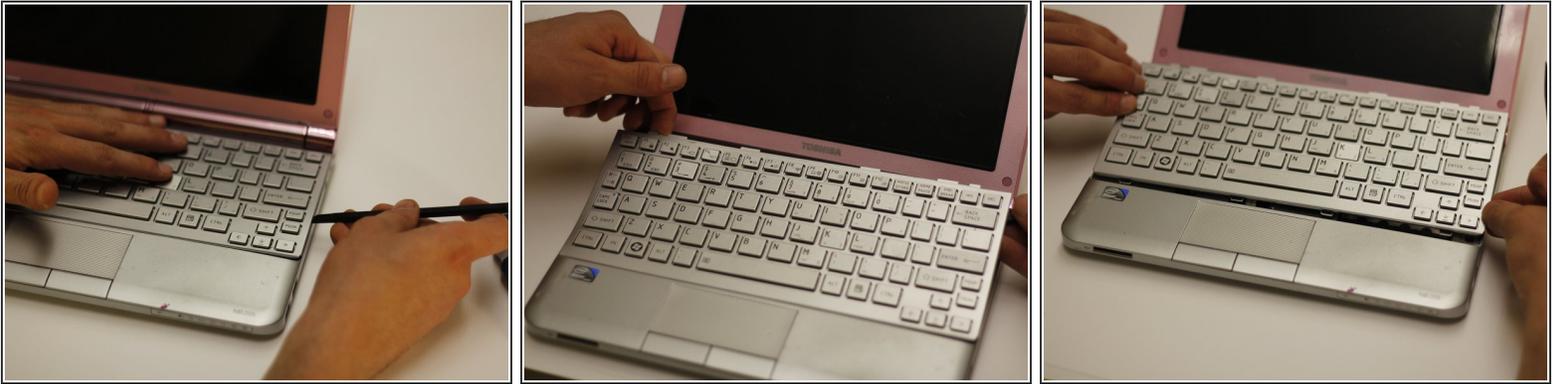

Step 3

- While holding the top of the netbook, flip the netbook over.

Step 4

- Carefully lift off the power bar assembly for access to the button and receiver.
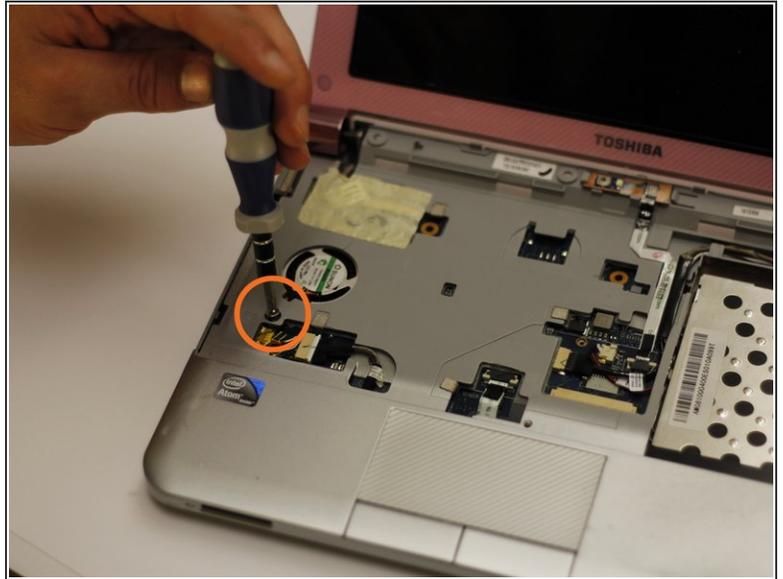

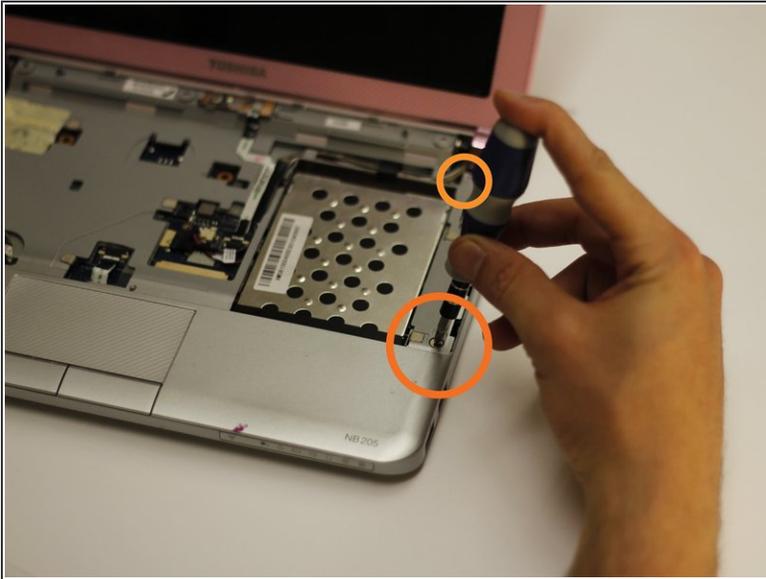

Step 5 — Speaker

- Use the spudger to gently pry around the keyboard. This will release the keyboard assembly from the body.
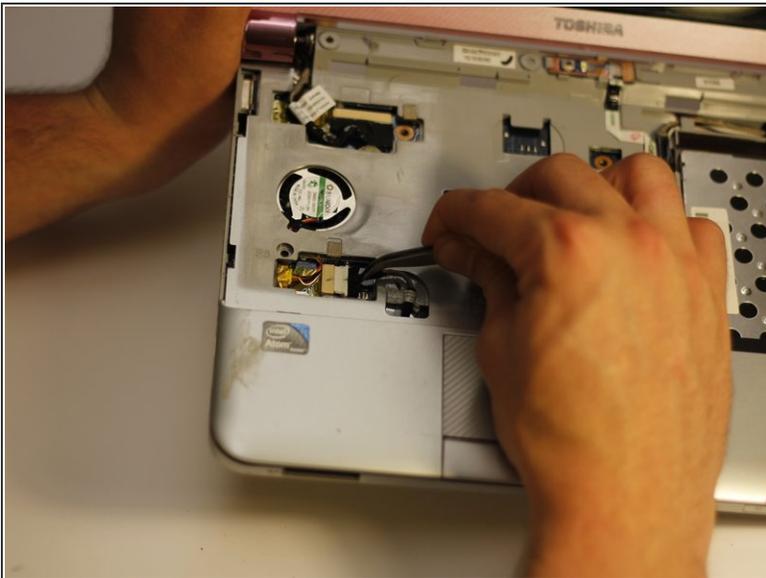

Step 6

- Reach under the keyboard and disconnect the electrical connection.

- Lift the keyboard assembly out and away from the netbook.

Step 7

- Remove the two noted screws, 5 mm in length, with a bit driver and Phillips 3/16" tool.
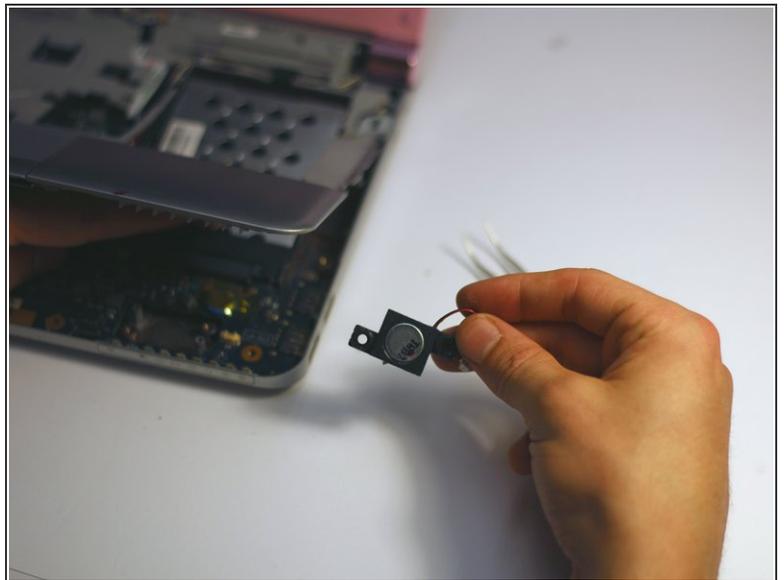

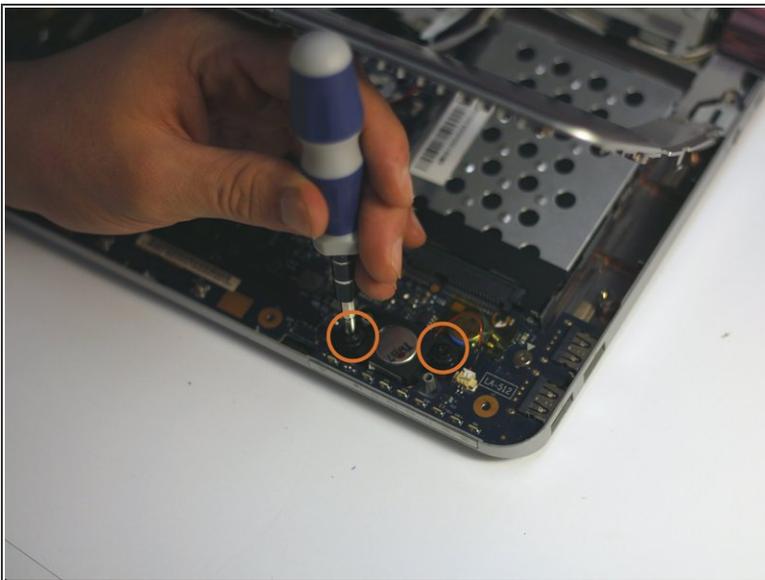

Step 8

- Remove this electrical connection with tweezers.

- Use a spudger to gently pry the bezel from retaining clips.

- This will allow the keyboard bezel to lift off of the body.

Step 9

- Use tweezers to remove the electrical connection to the old speaker assembly.

Step 10

- Use a bit driver and a Phillips #0 bit to remove the two retaining screws on the speaker assembly.
- Lift out the old speaker assembly.

To reassemble your device, follow these instructions in reverse order.
