## INTRODUCTION

The guide will assist users with replacing damaged ear cushions. It will show users how to replace a torn or worn out ear cushion with a new one.

---

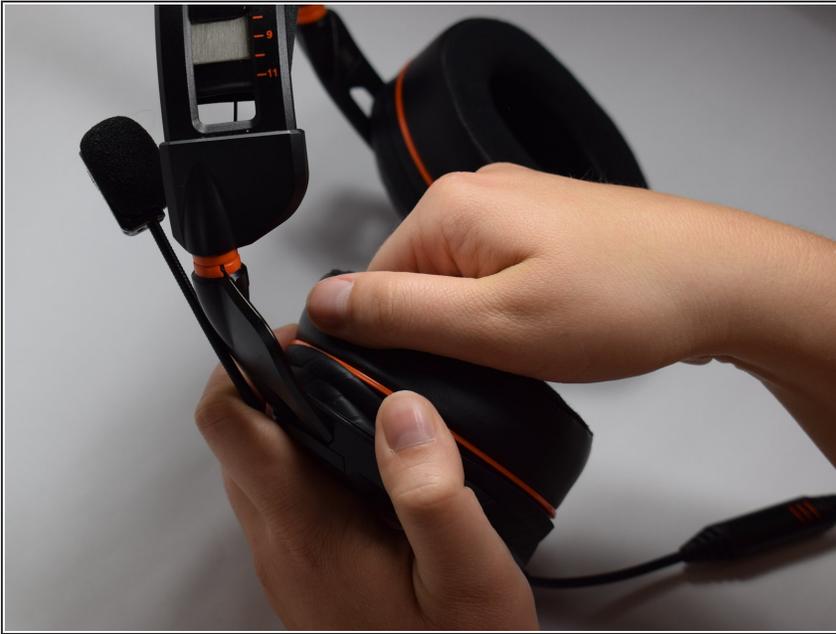

### PARTS:

- [Ear cushion](#) (1)

Turtle Beach Elite Pro

---

## Step 1 — Ear Cushions

- Firmly pinch ear cushion between thumb and forefinger.
- Using the hand not holding the ear cushion, grasp the orange plate that is below the ear cushion.

**⚠** If the black rubber lining on the orange plate is grasped, then the rubber lining on the ear piece may tear.

## Step 2

- Rotate ear cushion counter-clockwise about half an inch.
- ⓘ The ear cushion should audibly snap out of place.
- After it has audibly snapped out of place, lift the ear cushion off of the device.
- ☑ During reassembly, rotate the ear cushion clockwise.

### Step 3

- Using the new cushion, align the pegs located on both the orange plate and ear cushion.
- ☞ Make sure that both the ear cushion and the orange plate have the same designation.
- Once the pegs are aligned, push the new ear cushion in place.

To reassemble your device, follow these instructions in reverse order.
